

MySupplier

Build for less.

Real prices for building materials and equipment from every supplier, in one place.

Supplier Guide

How to list your products, win orders and work with contractors on the MySupplier marketplace

Who it is for	Distributors, agents, factories and warehouses of building materials, equipment and MRO parts
Time needed	Registered and live with your first offer in under an hour
Edition	09 / 2026
Support	suppliers@mysupplier.sa

Why sell on MySupplier?

Contractors, maintenance teams and facility operators check real, current prices before they buy. On MySupplier a buyer compares every supplier's offer for the same product in their city, prices a whole bill of quantities in one click, then orders directly or sends a request for quotation. **If your price is competitive and your stock is accurate, you are in front of every buyer in your city at zero marketing cost.**

No upfront fees

Registering and listing are free. A small commission (3% by default) applies to completed orders only and is itemised transparently in your statement.

Buyers ready to purchase

A full online store with 62 categories and 1,300+ standard products, cart and direct orders, payment by card, bank transfer, cash on delivery or credit terms.

RFQs and tenders

Open requests for quotation in your cities reach you automatically; you bid, and an award turns into an order by itself.

ZATCA-compliant invoices

A tax invoice with QR code compliant with the Zakat, Tax and Customs Authority and a delivery note are generated for every order.

Get started in five steps

- 1 Create a supplier account.** From "Sell on MySupplier" or "Sign up", choose Supplier. Enter the company name, city, commercial registration (CR) and VAT number.

- 2 Verify your company.** Upload the CR and VAT certificate under Documents. After our review you receive the **Verified** badge that buyers see next to every offer.
- 3 Set your branches and delivery cities.** Under Branches add your warehouses and the cities you serve; your offers only appear to buyers in those cities.
- 4 Add products and prices.** Using any of the four methods on the next page. Offers go live in the shop immediately.
- 5 Complete your storefront.** Logo, short profile, contact details, and bank details (under Finance) to receive payouts.

Tip: invite colleagues under Team as managers or sales staff so the account never depends on one person.

Four ways to list your products

Method	When to use it	Where
Add a price to an existing product	The product is already in the standard catalogue (cement, rebar, blocks, equipment, tools...). Pick the product and city, enter price, minimum quantity and lead time.	Price list → "+ Add price"
Sell a new product	The product is not in the catalogue. Enter Arabic and English names, category, unit, brand and specifications; it is created and listed at once.	"Sell on MySupplier"
Import a price list AI	You have a price list in Excel, CSV, PDF or even a photo. The system reads it, matches lines to the catalogue and shows you the result to review before publishing. Ideal for hundreds of lines at once.	"Import price list"
Connect your ERP	You run SAP, Oracle, Odoo, Dynamics or any other system. It pushes prices and stock automatically and pulls orders, with no manual entry.	"ERP & API" (see the last section)

Sell on MySupplier

List your products with live price and stock. They appear instantly in the shop, where buyers can add them to their cart.

Add a product
Creates the product if the SKU or name is new and publishes your offer.

Bulk upload (CSV)
One product per line. Header row is recognised; columns may be in any order when a header is present.

Required: name, categorySlug, unit, price. City defaults to Riyadh.

"Sell on MySupplier": add one product with a simple form, or upload a CSV with dozens of products.

"My products": full control of your offers

Here you see everything you sell exactly as buyers see it, with a summary that tells you how many offers are active and in how many **you are the cheapest in your city**. From the same card you edit directly:

- ✓ Base price and a time-boxed sale price
- ✓ Available stock (deducted automatically per order)
- ✓ Minimum order quantity and lead time in days
- ✓ Volume price tiers (e.g. 1–19 / 20–49 / 50+)
- ✓ Pause and resume an offer in one click
- ✓ Your own product photo
- ✓ Price validity date
- ✓ Live comparison with the best competitor price and 30-day sales

My products
Everything you sell on MySupplier, exactly as buyers see it. Edit price and stock inline, pause an offer, or add a photo.

Reviews & questions Sell a new product + Add product / price

TOTAL PRODUCTS	ACTIVE	CHEAPEST IN CITY	PAUSED	OUT OF STOCK	EXPIRED
350	350	244 offers where you beat every competitor	0	0	0

Search name, SKU, brand... All statuses All cities All categories Recently up

Live Cheapest Live Cheapest Live

Deformed Rebar 16mm Safety Helmet with 1-Gang 2-Way Switch

"My products" cards: a "Cheapest" badge when your price wins, with price and stock editable in place.

Important: prices are always entered **excluding VAT**. The platform adds 15% VAT, shows it to the buyer and itemises it on the invoice.

Requests for quotation and bids

Under Marketplace you see open RFQs in your cities: project, line items with quantities, delivery city and closing time. Submit a bid as a lump sum or line by line, with lead time and notes; edit it until closing or withdraw it. When the buyer awards it to you, **the bid becomes an order automatically** and you are notified by email and push notification.

Marketplace
Open requests for quotation. Bid before the closing time.

Search RFQ title or material... Riyadh Search

REFERENCE	TITLE	CITY	ITEMS	BIDS	DELIVERY	CLOSES
RFQ-2026-000001	Villa project foundations – Al Narjis, Riyadh Riyadh Horizon Contracting	Riyadh	4	3	16 Oct 2026, 21:05	2 Oct 2026, 21:05 Bid placed Update

Marketplace: open RFQs with the number of bids placed and the closing time.

Orders from receipt to delivery

- 1 New order** — you receive a notification. Check the items, delivery address and payment method, then press Confirm. Buyers can cancel only while an order is unconfirmed.
- 2 Preparing and shipping** — set the status to In transit and add the carrier and tracking number if any. The buyer sees every update live.
- 3 Delivery** — print the **delivery note** from the order page for the recipient to sign, then set the status to Delivered. The **tax invoice** with QR code is generated automatically.
- 4 Getting paid** — card and bank-transfer payments are collected by the platform and paid out to you in the weekly payout; cash on delivery is collected by you and confirmed after delivery; credit-term orders are invoiced with a due date.

From the order page you also message the buyer directly, see the full timeline and handle **return requests** (approve → goods received → full or partial refund).

Finance: net earnings after commission, the next payout and a per-order statement.

Reviews and questions

Buyers rate products after purchase and ask questions on product pages. Under Reviews & questions you reply to every review and answer every question; your answers are public and feed the company rating every buyer sees.

Replying within hours, not days, measurably increases orders.

Connecting your ERP

Each company can hold up to 20 API keys with specific scopes (read catalogue, write prices, write stock, read orders, update order status). Your system pushes prices and stock every few minutes in batches of up to 1,000 lines, pulls new orders, and receives webhooks the moment an order is created, changes status or a return is requested. The full technical guide, with ready examples for SAP, Oracle, Odoo and Dynamics, is on the “ERP & API” page and in the OpenAPI specification.

ERP & API

Connect SAP, Oracle Fusion, Dynamics 365, Odoo, Zoho or a custom system: push prices and stock, pull sales orders, push fulfilment status and receive events by webhook.

API keys

0 active · a company can hold up to 20 active keys. Give each system its own key with the minimum scopes.

ERP & API: create keys, test the connection and configure webhooks from one page.

Ten tips to win more orders

- 1. Update prices at least weekly** — an expired price disappears from comparisons.
- 2. Be the cheapest on your core lines** — the “Cheapest” badge attracts more clicks than any advert.
- 3. Set volume tiers** — contractors buy in bulk, and a 50+ tier wins the whole order.
- 4. Keep stock accurate** — an order cancelled for lack of stock hurts your rating.
- 5. Shorten lead times** — buyers sort by price, then by speed.
- 6. Complete verification** — verified suppliers visibly receive more orders.
- 7. Add real photos** of your products instead of the auto-generated images.
- 8. Write names in Arabic and English** so buyers find you in either language.

9. Answer questions and reviews the same day.

10. Watch your dashboard — win rate, most-viewed products and the lines where others undercut you.

Pre-launch checklist

- ✓ Supplier account in the company name with an official email
- ✓ CR and VAT certificate uploaded
- ✓ Branches and cities served defined
- ✓ Company logo and a short profile
- ✓ At least 20 products with prices and stock
- ✓ Volume tiers on your top 5 products
- ✓ IBAN entered to receive payouts
- ✓ A second team member with manager rights
- ✓ Mobile app installed, notifications enabled
- ✓ First RFQ answered

Mobile app: everything in this guide is also in the MySupplier mobile app: instant order and RFQ notifications, price and stock edits, and order confirmation from anywhere.

We are with you: the supplier team helps you upload your first price list and connect your system free of charge. Write to suppliers@mysupplier.sa or use "Contact us" inside the platform.
